

Long John

THE DELIVERY BIKE - HAND-MADE IN SWEDEN

LONG JOHN - Your 2-wheel delivery van!

The Long John is a cargo bike with a long history. For 70 years it has carried loads of up to 100 kilos, with just human power. Production was stopped in 2003, but USED has convinced Monark that the time is right for the Long John revival. In a modern urban scenario the Long John can move heavy loads with ease and with zero emission.

The Long John is an eyecatcher because of its impressive retro design style. The extended wheelbase enables the driver to carry the load in his field of view, which means the load is always visible to the driver unlike having the load in a trailer behind you. The low center of gravity ensures safe riding even when carrying heavy cargo. There is a very robust double stand beneath the cargo platform for safe parking.
